 #19 Nur Fateh Lane, Lalbagh, Dhaka, Bangladesh

Education

Apr 2018 - May 2023	Bangladesh University of Engineering and Technology (BUET) Bachelor of Science in Computer Science and Engineering	Dhaka, Bangladesh CGPA: 3.63/4.00
------------------------	--	---

Technical Skills

Languages:	Java, Python, C, C++, HTML5, CSS, Bash
Frameworks:	React.js, Node.js, Django, Spring Boot
Databases:	Oracle PL/SQL, MySQL, MongoDB
Miscellaneous:	Git, Github, \LaTeX , NS3, PacketTracer, Wireshark

Experience

Jun 2023 - Aug 2023	Computer Network Systems Limited (CNS)  Assistant Software Engineer Collaborated as a team member on the rewrite of a government payment collection and tax distribution project, utilizing Java Spring Boot and React.js to optimize performance, compliance, and enhance database functionality with Oracle Database for improved data management and retrieval.	Dhaka, Bangladesh
Oct 2023 - Present	Optimizely  Software Engineering Intern	Dhaka, Bangladesh

Undergraduate Thesis

[Thesis]	Knowledge Graph-Based Categorization of Newspaper Articles in a Newspaper Corpus  Istiaq Bin Mahmud, Soham Khisa Advisor: Dr. Muhammad Masroor Ali - Our thesis proposes a newspaper categorization system that utilizes ontology to extract metadata from unstructured HTML news articles. We use the IPTC Media Topics taxonomy, which categorizes text using over 1200 terms, to categorize the articles based on ontology concepts.

Projects

Moodle LMS

Tools & technologies used: ReactJS, NodeJS, ExpressJS, MongoDB

- ▶ We developed a Moodle LMS (Learning Management System) for our software engineering project. We utilized the MERN stack (MongoDB, Express, React, Node) to develop a web-based LMS platform. This website was inspired by <https://moodle.cse.buet.ac.bd>. Check this project on [Github](#). The demonstration is available [here](#).

Blood Donating Platform

Tools & technologies used: Django, Javascript, HTML, CSS

- ▶ We designed and developed a blood donation app as an undergraduate project. The website allows users to sign up as donors, specify their blood type, and provide their contact information. When a blood drive or a hospital requests blood, the app sends notifications to eligible donors in the area, allowing them to quickly and easily respond to the call for donation. Check this project on [Github](#).

Retro Shooting Game

Tools & technologies used: C++, ATmega32

- ▶ We built a retro shooting game using C++ and the ATMEGA32 microcontroller. This game features 2D graphics, simple and fast-paced action, and a focus on high scores and player skill. The goal is usually to achieve the highest score possible, either by surviving for as long as possible or by collecting points for defeating enemies. Check this project on [Github](#). The Demonstration is available [here](#).

Scholarships and Certificates

- ▶ University Merit Scholarship (1st & 2nd Semester)
- ▶ Board Scholarship in Higher Secondary School Certificate Examination.
- ▶ Board Scholarship in Secondary School Certificate Examination.
- ▶ Bangladesh Chemistry Olympiad Division (3rd | Chattogram)
