EDUCATION	Bangladesh University of Engineering and Technology B.Sc in Computer Science and Engineering <ul style="list-style-type: none">Thesis Supervisor: Dr. Muhammad Masroor AliCoursework: <i>Discrete Mathematics, Data Structures and Algorithms, Digital Logic Design, Theory of Computation, Database, Computer Architecture, Compiler, Microprocessors, Microcontrollers, and Embedded Systems, Operating System, Artificial Intelligence, Computer Networks, Computer Security, Computer Graphics, Basic Graph Theory, Machine Learning</i> etc.	GPA : 3.63/4.00 April 2018 - May 2023
HONORS AND AWARDS	Dean's List Award General Merit Scholarship, Higher Secondary School Certificate Examination Talentpool Merit Scholarship, Secondary School Certificate Examination 3rd position, Bangladesh Chemistry Olympiad Division, Divisional round (Chittagong, Bangladesh)	2018, 2019 2017 2015 2015
RESEARCH EXPERIENCE	Undergraduate Thesis [PDF] <i>Supervisor: Dr. Muhammad Masroor Ali</i> Our thesis proposed a newspaper categorization system that utilizes ontology to extract metadata from unstructured HTML news articles. We used the IPTC Media Topics taxonomy, which categorizes text using over 1200 terms, to categorize the articles based on ontology concepts.	June 2022 - May 2023
PROJECTS	Moodle LMS [Code] [Demonstration] We developed a Moodle LMS (Learning Management System) for our software engineering project. We utilized the MERN stack (MongoDB, Express, React, Node) to develop a web-based LMS platform. This website was inspired by moodle.cse.buet.ac.bd . Blood Donating Platform [Code] We designed and developed a blood donation app as an undergraduate project. The website allows users to sign up as donors, specify their blood type, and provide their contact information. When a blood drive or a hospital requests blood, the app sends notifications to eligible donors in the area, allowing them to quickly and easily respond to the call for donation. Retro Shooting Game [Code] [Demonstration] We built a retro shooting game using C++ and the ATMEGA32 microcontroller. This game features 2D graphics, simple and fast-paced action, and a focus on high scores and player skill. The goal is usually to achieve the highest score possible, either by surviving for as long as possible or by collecting points for defeating enemies.	
PROFESSIONAL EXPERIENCE	Optimizely , Dhaka, Bangladesh <i>Software Engineer I</i> <ul style="list-style-type: none">Working as full-stack developer in the Web Delivery - Experimentation team<i>Tools & Technologies:</i> Flask(Python), React.js, Vue.js, Google Cloud Platform	October 2023 - Present

Computer Network Systems Limited, Dhaka, Bangladesh

Assistant Software Engineer

June 2023 - August 2023

- Worked as a full-stack developer
- Worked primarily with Java Spring Boot, React JS, Oracle DBMS

TECHNICAL SKILLS

- Languages: Python, Java, C, C++, HTML5, CSS, Bash
- Frameworks: Flask, React.js, Node.js, Django, Spring Boot
- Databases: GCP Datastore, Oracle PL/SQL, MySQL, MongoDB
- Miscellaneous: Git, Github, L^AT_EX, NS3, PacketTracer, Wireshark
